

# Neutrakon<sup>®</sup> Neutralizer Type 06/B for Oil – Condensing - Boilers

Daten sheet 88-300-102engl

Instruction manual 88-400-107

Drawing 88-333-127

01/2010

Characteristics:	Neutralizes condensates from oil condensing boilers with stainless steel or ceramic heat exchangers
Nominal thermal load on the Upstream heat source	: max. 50 kW
Fuel :	Heating oil
Connecting dimensions:	DN 40 and / or hose 20mm
Dimensions:	L660 – B150 – H208 Diameter Ø125mm
Mounting dimensions:	L 705mm
Neutralizer:	Neutrakon <sup>®</sup> granule, 4,1 kg
Activated charcoal:	D47 / 500 g
Temperature max.:	60°C
Maintenance interval:	annually
Condensate inlet:	min. pH 2
